My Stop – School Bus Tracking System

The Stafford County Public Schools Transportation Department offers parents and guardians the ability to track their student's bus from a computer or mobile device. My Stop displays the school bus's approximate location on a map, as well as the estimated time of arrival (ETA) to a specific student's bus stop. The school bus's location is automatically updated every few minutes, and the ETA is recalculated to accommodate any delays due to traffic while the bus is in route. The retrieval of bus information requires a separate login for each student - siblings **are not linked.**
