

Virginia's Stafford County Public Schools Selects Tyler Technologies' ERP Solution to Automate Financial and HR Processes

School district selects Tyler's Munis software suite to eliminate standalone systems and integrate processes

PLANO, Texas – July 21, 2015 – Tyler Technologies, Inc. (NYSE: TYL) has signed an agreement with Virginia's Stafford County Public Schools (SCPS) for Tyler's Munis® enterprise resource planning ([ERP](#)) solution. The agreement includes software licenses, professional services, maintenance and support.

“We determined after conducting due diligence that Munis is a robust and affordable system that is fully automated and integrated, which addresses the functional needs and requirements we were looking for in a new system,” said SCPS Assistant Superintendent for Financial Services Lance Wolff. “With Munis, we'll be able to provide our users with more timely information, improved reporting capabilities, and the ability to eliminate redundant and unnecessary manual processes.”

SCPS selected Tyler's Munis ERP solution to eliminate standalone financial, human resources, payroll and benefits systems, and to increase the speed and accuracy of transaction processing. To do this, SCPS invested in a wide range of [Munis](#) applications, including financial management, human resource management, content management and employee self-service.

“Tyler has decades of experience providing schools with the software needed to succeed,” said Chris Hepburn, senior vice president of Tyler's ERP & School Division. “We're pleased Stafford County Public Schools saw the value that Munis brings to school districts and we look forward to helping them achieve their goals.”

Stafford County Public Schools has approximately 27,350 students across 30 schools. The county is 40 miles south of the District of Columbia and is part of the Washington-Arlington-Alexandria Metropolitan Statistical Area with a population of almost 137,000.

About Tyler Technologies, Inc.

Tyler Technologies (NYSE: TYL) is a leading provider of end-to-end information management solutions and services for local governments. Tyler partners with clients to empower the public sector — cities, counties, schools and other government entities — to become more efficient, more accessible and more responsive to the needs of citizens. Tyler's client base includes more than 13,000 local government offices in all 50 states, Canada, the Caribbean, the United Kingdom and other international locations. Forbes has named Tyler one of “America's Best Small Companies” eight times and the company has been included six times on the Barron's 400 Index, a measure of the most promising companies in America. More information about Plano-based Tyler Technologies can be found at www.tylertech.com.
